Commercial Data Systems Provides Cost-Effective NetApp Procurement in New Mexico with WSCA Certification

- Government agencies and educational organizations can efficiently and cost-effectively acquire NetApp products through CDS -

ALBUQUERQUE, NM – March 1, 2010 - Commercial Data Systems (www.cdsinc.com), a leading IT consultancy and systems integrator, in partnership with NetApp, is pleased to announce its WSCA certification for government procurement in the state of New Mexico. CDS is New Mexico's leading provider of virtualization technology and NetApp's Star Partner for authorized professional services in the state.

The Western States Contracting Alliance (WSCA) was formed in October 1993 by the state purchasing directors from fifteen NASPO western states. The primary purpose of creating WSCA was to establish the means by which participating states may join together in cooperative multi-state contracting. This approach helps states to achieve cost-effective and efficient acquisition of quality products and services.

"As a NetApp partner, we are pleased to promote this certification by the Western States Contracting Alliance," said Mark Gilbert, president, Commercial Data Systems. "With our WSCA certification, government agencies can now take advantage of the best possible IT solutions and services in the marketplace while cost-effectively and efficiently meeting their procurement goals."

NetApp creates innovative storage and data management solutions that accelerate business breakthroughs and deliver outstanding cost efficiency.

About Commercial Data Systems, Inc.

Founded in 1986, Commercial Data Systems, Inc. is an IT consultancy and systems integrator specializing in virtualization, HPC, Cross Domain Security, Applied Technology and Enterprise Services. As a trusted advisor for government and commercial clients, CDS partners with many IT providers, including Oracle, HP and NetApp. The company specializes in the government, education and commercial markets in the U.S. and the Pacific Rim. In addition to product expertise, CDS offers a complete range of IT consulting, engineering, training, and support services. CDS was founded in Honolulu with a "mainland" headquarters in Albuquerque, NM. Additional offices are located in California, Colorado, Florida, Texas and Virginia.
